SOUTHERN'S EARNINGS GROW. South Prosperous.

The annual report of the Southern Railway Company for the year ended June 30, published yesterday, shows a large increase in gross earnings. The gross earnings were \$45,109,777, a gain of \$2,755,717. Although there was an increase in operating expenses the net earnings from operation amounted to \$622,390 more than last year. After the preferred dividend was paid, there was a surplus \$337,922 greater than

last year.
Several railroad properties were acquired by the company during the year, including the Tennessee Northern, the Knoxville and Bristol, and a half interest Knoxville and Bristol, and a half interest in the Charleston Terminal Company, the Atlantic Coast Line being the other owner. In the year the two terminal companies in New Orleans were consolidated, and the Southern Railway, with the St. Louis and San Francisco Railroad, has secured control of the company. Extensive improvements of the terminal properties have been commenced.

commenced.

President Samuel Spencer says that the growth of that part of the Southern States traversed by the lines of the company has been very encouraging during the year.

Chicago Shipbuilding Co. May Resume CHICAGO, Oct. 7 .- It was reported to-day tha the Chicago Shipbuilding Company, South Chicago, would resume operations on Oct. 15, after having been shut down since last May. Twelve thousand men have been idle. The company is the local branch
of the United States Shipbuilding Company
and has a large plant at 101st street and
the lake. At the offices of the company to-day none was present who would con-firm or deny the report.

Live Stock Market.

Receipts of beeves were 3.767 head, including 55 cars for export alive, 101 cars for slaughterers and 31 for the market; making, with the few cars held over yesterday, 35 cars on sale. Steers were in fairly good demand and prices firm to a shade higher, bulls and cows steady; the yards were cleared. Common to good native steers sold at \$8.60@35.50 per 100 lbs; half breeds at \$3.60@35.50 per 100 lbs; tressed beef selling quite freely at steady prices. Native sides ranged from 6½ to \$9½c. per b.; Texan beef sold at \$5½c@6½c. Liverpool and London cables quoted live cattle steady at \$1½c. per b., dressed weight; sheep selling at 10½c. 11½c., per lb., dressed weight; sheep selling at 10½c. 11½c., per lb., dressed weight; sheep selling at 10½c. 11½c., per lb., dressed weight; sheep selling at 10½c. 11½c., dressed weight; sheep selling at 10½c. 11½c. per lb., dressed yeals at 10½c. per lb., dressed weight; sheep selling at 10½c. per lb. Exports to day, none; to morrow, 1,112 beeves, 30 sheep and 6,228 quarrers of beef. Receipts of calves were 277 head, including 166 for butchers, and, with the few stale caives, there were 810 ns sale. Veals were no more than steady; grassers almost noninal; no Westerns offered. Common to prime veals sold at \$4@\$5.50 per 100 lbs.; grassers at 4@5c.

Receipts of sheep and lambs were 3,412 head, including 6 cars for slaughterers and 9 for the market; and, with the stale stock, there were 12 cars on sale. On light receipts the market ruled firm to a shade higher, and all the early arrivals were quickly disposed of. Common to choice sheep sold at \$3.60 per 100 lbs.; lambs at \$5.60 per 100 lbs.; lambs

FINANCIAL AND COMMERCIAL.

FRIDAY, Oct. 7.

There was a very perceptible lessening in the activity of business on the Stock Exchange to-day, but the tendency of prices, save in the last hour of the exchange session, was toward a recovery of the losses sustained yesterday. Quotations in London for our leading stocks before the opening of our market were somewhat irregular and showed declines in a greater number of instances than they have recently. The purchases of London houses here, however, during the day were about as numerous as the sales. Speaking generally, the strength of the market during the greater part of the day is to be attributed to the fact that speculators were very quick to seize the profits that awaited them this morning from their operations yesterday for the fall and also that yesterday's decline brought into effect only a small quantity of stop loss orders. On the other hand, when the rebound in prices caused by these forces was to-day accomplished there was very little desire, apparently, on the part of speculators for the rise to push the advance further. The market, though it continued strong, became dull, and finally prices again receded, so that at the close a full half of the day's gain had been lost and the tone of the market was changed from firmness to one of more uncertain char-

As usual, advances in two or three stocks to-day were much greater than in others. Out of the slightly over 800,000 shares of stock bought and sold more than one-quarter were of Reading common, and the price of this stock, which at one time yesterday was 68%, was at one time to-day 72%. As the control of the Reading property is now absolutely lodged in strong hands, there is no idea that a "contest" for this three-quarters (1%) per cent. on the preferred atock from the earnings. Payable October 25th, 1904, to stockholders of record October 15th, 1904. price of the stock is that it has been anticipative of a dividend distribution. It is a matter of record that the Reading's net earnings last year showed a surplus available for dividend distribution on the common stock of about 61/2 per cent.; but it is also well known, of course, that the coal business last year was exceptionally profitable owing to the severity of the winter and the depletion of coal stocks caused by the incidents of the year before and that the Reading earnings statements of the two months of the present fiscal year have shown a decrease in net of over \$700,000. Moreover, to-day's report of the production of anthracite in September showed a decrease of nearly 400,000 tons as compared with September a year ago. Whether therefore, the Reading directors will, next spring, feel like placing the Reading common stock upon as high a basis as that of a 4 per cent. dividend payer seems problematical, at least, and even if this dividend basis is to be established it must be considered by every conservative critic that there is a certain price at which it can be said that the stock has quite discounted the event. It can, of course, be substantially urged on the other side that the supply of anthracite coal in our country is limited, that of this the largest share is in the hands of the Reading company and that, in general, the coal business is one whose profits may be expected to increase rather than to diminish in the future. All the coal road stocks to-day were strong, in sympathy with the Reading shares, while Erie, Pennsylvania, New York Central, St. Paul, Missouri Pacific and other prominent stocks rose a point or more apiece; all these shares, however, lost a good part of their gain as described. American Sugar Refining was strong in the latter part of the day upon larger transactions than have recently been noted in this issue, while Amalgamated Copper scored an extreme advance of 11/2 points because, no doubt, of the increasing strength of the copper trade position. List prices for raw copper have been advanced by degrees, % of a cent in less than a week. The influence of this fact was, naturally, most noticeable to-day in the Boston stock market where the securities of the chief copper producing companies are dealt in.

Call money to-day was somewhat harder, rising in the afternoon to 21/2 per cent., and the weakness of the market in the final dealings was, it may be, due to this development. Forecasts of the bank statement to-morrow were that the banks have lost in cash during the week over \$7,000,000. and the returns upon which these estimates were based showed that the shipment of funds to the interior had been larger than on any week thus far of the outward movement of money.

GOSSIP OF WALL STREET.

The opening of the market found room sentiment mixed, without, however, any particular disposition on the part of the big traders to test prices as they have done in the early trading in the past. There was no feature to the trading until the movement in Reading got under way, when the vigor of its advance began to carry the rest of the list up with it. The floor had looked for the appearance of stop orders and a resump-tion of Thursday's liquidation. When these failed to develop the room came to a sort of half-conclusion that the selling of the day before had been taken easily with the object of inducing a short interest to further another advance. The sales were well taken and the buying in some issues looked good.

Conspicuous on the buying side in Reading were the same people who worked up Pennsylvania and Erie. The stock responded readily to their efforts and had gained 2 points by noon on a volume of some 147,000 shares. A house which had accumulated a big line, perhaps 30,000 shares, earlier in the week, had in an order for 10,000 shares at 71, but the order could not be filled at the price, and was executed at 71%. Philadelphia was a liberal buyer. Wassermann was credited with purchases of between 15,000 and 20,000 shares in the morning session. John W. Gates was a big buyer, selling heavily later.

The room called the buying of New York Central especially good.

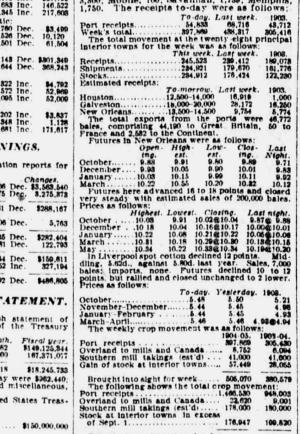

Ontario and Western's impetus in the early trading came from London, which is still optimistic on the stock on the theory that its control is so held at present that it can readily be turned over to some big road, the New Haven being most frequently mentioned.

Bullish statements regarding the steel trade outlook were made yesterday by Charles M. Schwab: also by Mr. Gates, who it will be recalled was once in the steel way himself. but these went practically unreflected in the stocks of the Steel Corporation. Mr. Schwab said he would be surprised if the coming year was a poor one in the trade, and Mr. Gates said: "If certain steel manufacturers say there is no improvement in iron and steel conditions they are not telling the truth." Mr. Schwab's statement came out after that of Mr. Gates.

The room thought that much of the buying of Steel preferred was good, and that higher prices for it would be made.

Amalgamated Copper made another new high record for the year, stimulated by a further advance in the price of the metal, and the old theory regarding its break through 60. An effort was made to give an impression of trade buying, but the floor had its doubts. A decided movement in the stock has before this marked the temporary end of an upward movement. J. S. Bache & Co. were buyers.

As a result of the long continued bull market, rumors are beginning to fill the Street regarding the finances of the bucketshops. These seem based more on the experience of such institutions in their struggles with rising markets in the past than on actual developments at the moment. Their ability to stand the strain so long has called forth no little admiration from critics who have, perhaps, overlooked the fact they, too, have not stood still while the community of interest idea has spread, but have adopted it eagerly, persuaded that in union there is strength and no ruinous competition. As a matter

1 3

short interest has been liquidated of late but it is very generally believed that a large New Vork interest on the bear side still remains uncovered New England mills were understood to be buying to some extent. The crop movement for the west turned out to be considerably smaller than was at one time expected and the exports were again on a liberal scale. Manchester's reports were very cheerful and it is evident that the English trade looks for a continuance of the present activity on a furn basis of values.

Miller & Co. salt: "Liverpool advices continue builts and apinners are reported to be actively buving, sales, however, being kept within bounds owing to the small supply available in liverpool it must be remembered that only a very small amount of cotton has, so far reached he other side, but, as soon as that splinners purchases will be very disposed to follow spots closely, and miller excelles to asy that, so long as they work together in such a groove, the situation is a very healthy one. Advices from the South continue to report good spot idemand at full prices. One of the falorable features of the present quiet steadiness a tree prices of goods would adjust themselves probable effect on the drygoods market. All that the goods trade needs is a stable value for raw cotton, and if this should be maintained for a little time prices of goods would adjust themselves prombable and splaners would buy their supplies freely. The consuming public is not in any distress and is able to absorb a large crop. All that is needed it some stable basis to work on, which will permit mills to manulacture at a profit."

Dick Bros., Fernie Wilson & Co., Norden & Co. and McFadden Bros. were good buyers. Wall Street houses were the principal sellers.

Marshall, Spader & Co. said: "The movement to Nov.! I promises to be nearly a record for the same period in any year. Continued increase in the world sy visible supply will again be a feature of this week's statistical changes, and we expect this to continue well into the future.

out of all holdings, so we will see a failing oft in receibts.

Grain.—Wheat—Spot was dull. No sales No 2 red winter, 14c. over New York December. The Northwestern receipts were 881 cars, against 938 last week and 667 last year; Chicago, 46 cars, against 21 last week and 667 last year. Futures closed \$4c. to 1c. lower. Sales, 3,000,000 bush. Prices as follows;

hans, overlooked the fact they, too, have not stood still while the community of interest idea has apread, but have adopted it eagerly, persuaded that in union there is strength and no ruinous competition. As a matter of fact, some of these concerns are preasing the telegraph conjunites for most that business is greater than they can bandle with economical results.

The rise in Sugar was started by Ellingwood & Cunningham, with traders following this lead. Dick Bros. were among the commission house buyers. The buying of £ & C. Randolph was looked on as good.

Sentiment in the early trading yesterday was largely influenced by reports which were in general circulation that there had been some sort of rupture among the interests supposed to be working for higher prices. No one on the foor sewheth her reports asid had arisen, but every one seemed certain that it was just as well to go slow if there was any question of "selling out of non-bandle and her some was infimated might be the case. The failure of such a manifestation to develop and the uphidding of resulting convinced the room that the reports were united.

The rise was many question of "selling out of the case. The failure of such a manifestation to develop and the uphidding of resulting convinced the room that the reports were united.

The betteroulitinists and wall tog of the case. The failure of such a manifestation to develop and the uphidding of resulting out of the case. The failure of such a manifestation to develop and the uphidding of resulting on the case. The failure of such a manifestation to develop and the uphidding of resulting out of the case. The failure of such a manifestation to develop and the uphidding of resulting the case is a supplicion that there is a vulnerable short interest in these issues and that it may fail in its reliance on the opening of the subway.

The was some evidence of a switching of speculative operations to the preferred shares of the industrials, apparently on the theory that it is the proving of the subvey of the
